📍 Jhunjhunu, RJ

SUMMARY

Recent Computer Science (Data Science) graduate specializing in Full-Stack Web Development (MERN). Proficient in building secure, state-driven user interfaces with React and Tailwind CSS, backed by Node.js and MongoDB architectures. Seeking an entry-level developer role or internship to engineer scalable web applications and bridge data-driven logic with modern frontend design.

PROJECTS

Web Development Projects

NexLockr (Secure Password Manager) | React, Node.js, Express, MongoDB, Tailwind

📅 2026

🔗 nexlockr.netlify.app

GitHub: [NeerajSaini271/NexLockr](#)

- Engineered a full-stack password management application using React for the dynamic frontend and a Node.js/Express backend connected to a MongoDB database.
- Developed a custom, state-driven UI toggle feature utilizing React hooks to securely mask and unmask user passwords on demand.
- Architected a premium, responsive dark-mode dashboard using Tailwind CSS utility classes, completely overhauling the standard UI for a custom user experience.

E-Commerce & Media UI Replicas (Amazon & Netflix)

📅 2024 - 2025 📍 Pilani, RJ

🔗 ecommerce-ui-demo.netlify.app

Netflix: [Netflix India](#) | GitHub: [NeerajSaini271/Netflix-Clone](#)

GitHub: [NeerajSaini271/Amazon-Clone](#)

- Engineered a **fully responsive Netflix UI** using CSS Media Queries to ensure seamless adaptation and layout stability across mobile and desktop devices.
- Architected a complex **Amazon Desktop Interface**, utilizing **nested CSS Grids** and Flexbox to structure extensive product hierarchies and multi-layer navigation bars.
- Technologies Used:** HTML, CSS.
- Replicated high-fidelity UI patterns, including immersive hero banners (Netflix) and dense informational grids (Amazon), ensuring pixel-perfect visual accuracy.

Web-Based Audio Streaming Interface (Spotify)

📅 2025 📍 Pilani, RJ

🔗 spotify-clone-bm.netlify.app

GitHub: [NeerajSaini271/Spotify-Clone](#)

- Engineered a dynamic **Single Page Interface** using **Vanilla JavaScript (ES6+)** and the **DOM API** to manage real-time playback state without frameworks.
- Built a custom audio control system using **Event Listeners** and the **HTML5 Audio Object** to handle precise seeking, volume adjustment, and track progression.
- Implemented **data-driven DOM rendering** to generate dynamic playlists from JSON data, enabling instant track switching and metadata updates.
- Optimized the player interface using **CSS Flexbox**, ensuring the playback controls remain persistent and usable across mobile and desktop viewports.

Desktop-First Social Media Interface (X Clone)

📅 2025

🔗 x-clone-bm.netlify.app

GitHub: [NeerajSaini271/X-Twitter-UI-Clone](#)

- Architected a high-fidelity **3-column desktop layout** (Sidebar, Feed, Widgets) that accurately mimics the structural hierarchy of the X (Twitter) web platform.
- Implemented a **fluid central feed** using Tailwind CSS to ensure content remains scrollable and readable on smaller screens, while maintaining a full widget-rich interface on desktop.
- Leveraged **Tailwind CSS utility classes** to manage complex spacing and typography, drastically reducing custom CSS while ensuring pixel-perfect component alignment.
- Deployed on **Netlify** for hosting and live demonstration.

KEY ACHIEVEMENTS

Academic Excellence

Maintained a strong cumulative score of **87.2%** throughout B.Tech program.

Deployment & Hosting

Successfully deployed 3+ live web applications on **Netlify**, ensuring cross-browser compatibility.

UI Complexity

Engineered a functional music player interface for the Spotify Clone using **JavaScript DOM manipulation** to handle audio states.

Collaboration & Version Control

Actively engaged with open-source repositories to practice Git workflows and understand collaborative coding standards.
