SUMMARY

MERN Stack Developer and Computer Science graduate with hands-on experience building responsive interfaces, secure APIs, authentication workflows, and database-backed applications. Currently contributing as a MERN Stack Intern at UptoSkills, with 59 closed pull requests across InternOps and AI Mentor. Experienced with React, Next.js, Node.js, Express, MongoDB, PostgreSQL, Firebase, Git, and modern frontend tooling.

EXPERIENCE

MERN Stack Intern

UptoSkills

04/2026 - Present Remote

- Contributed 46 closed pull requests to InternOps across authentication, role-based workflows, attendance, ratings, administrative tooling, image delivery, frontend performance, and backend reliability.
- Contributed 13 closed pull requests to AI Mentor across authentication security, course progress, discussion moderation, API error handling, database integrity, SEO, and AI-service stability.
- Improved secure session and authentication workflows, protected application routes, strengthened error handling, and supported role-based access behavior.
- Built responsive React interfaces, loading states, administrative dashboards, data workflows, and persistent light and dark themes.
- Used collaborative Git workflows, focused validation, code review, and debugging to deliver frontend and backend changes through pull requests.

PROJECTS

NexLockr - Secure Password Manager

2026

nexlockr.vercel.app

Full-stack credential manager built with React, Node.js, Express, MongoDB, and Tailwind CSS.

- Built registration, authentication, expiring sessions, encrypted credential storage, and owner-isolated credential management.
- Implemented responsive search, password visibility controls, loading and error states, and persistent light and dark themes.

TaskFlow - Personal Task Manager

2026

taskflow-personal-task-manager.vercel.app

Local-first task manager built with React, Vite, Tailwind CSS, and JavaScript.

- Built task creation, editing, completion, deletion, priorities, due dates, search, filtering, sorting, and progress tracking.
- Added corrupted-storage recovery, cross-tab synchronization, persistent themes, accessible controls, and focused tests.

DevCanvas - Frontend Engineering Journal

2026

devcanvas-frontend-journal.vercel.app

Responsive frontend-engineering journal built with Next.js, React, Tailwind CSS, and JavaScript.

- Developed search, topic filters, featured articles, and statically generated article pages with structured metadata.
- Added custom visual artwork, accessible navigation, visible focus states, reduced-motion support, and persistent themes.

KEY ACHIEVEMENTS

Intern of the Month

Recognized by UptoSkills in August 2026 for performance and contributions in the MERN Stack domain.

59 Closed Pull Requests

Delivered verified contributions across InternOps and AI Mentor covering frontend, backend, security, databases, reliability, and user experience.

Academic Achievement

Completed B.Tech in Computer Science (Data Science) with a final CGPA of 8.72/10.
